FIRST Robotics at Brighton High is an excellent way for our students to gain technical experience and learn hands on engineering skills. It has been our experience that when our students participate in a high level engineering project of competitive nature they are more likely to choose a science or engineering major in college. FIRST Robotic competitions are an excellent way for students to learn how to focus on a difficult task and work as a team in a professional manner. Our mission is to give Brighton High School students a meaningful, hands-on, educational experience that excites and motivates them. Our hope is to encourage our youngsters to strive higher and look beyond their limited community options towards a possible future in an engineering-related field that is beneficial to society.
