

UNIVERSITY OF JUBA

Date: 29 March, 2013

Dear Gelfand Family Charitable Trust,

The College of Engineering and Architecture of the University of Juba has recently received with much enthusiasm the Electronic devices you humbly donated through our Vice Chancellor's office. In this regard, and on behalf of our entire college, I am extending our profound acknowledgement and gratitude for the valuable Electronic equipment you donated to our university.

We assure you that our college which at present lacks equipment for training its students in all specializations shall print your name in its memorial records as the philanthropist who first supported us with these valuable instruments which marked the first cornerstone for establishment of our Electronic Laboratory. We anticipate more donations from you.

Thank you for your generosity and your support for technology transfer worldwide. We believe that this is not the only college which has benefitted from your charity. God bless you.

Thanks and best regards,

Dr. James Janthana Bongo
Dean, College of Engineering & Architecture,
University of Juba
Republic of South Sudan
